

A renewable & wireless power source

Enables monitoring in unreachable places

## What's in it for you?

-  High ROI
-  Eliminates need for cables/batteries
-  A truly wireless power source
-  Enables remote monitoring

ReVibe Energy is aiming to become the world's leading distributor of vibration energy harvesting systems.

Sensor systems are being used all over the industrial world in order to optimize operations and minimize breakdowns. These sensors are powered by expensive power sources; cables & batteries.

ReVibe Energy provides a long-lasting, sustainable and cost efficient power source through transforming vibrations into electricity.

Our harvesters can be mounted straight to the vibrational source and be left in operational mode for +10 years.
